Tech-stack webovej aplikácie Reddit

Adam Kurek

Čo je to Tech stack

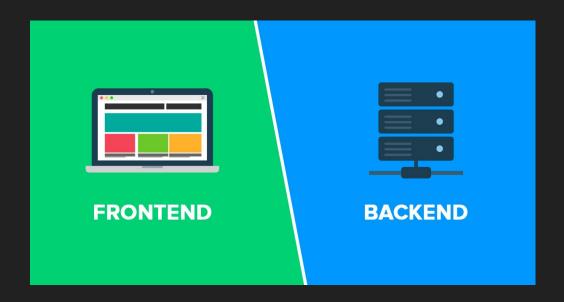

- je to suhrn technológií ktoré napomáhajú pri tvorbe aplikácie

Zakladne webové koncepty

Frontend - strana klienta

Backend - strana servera

Frontend technológie pre Reddit

- HTML
- CSS
- Javascript
- React
- Jquery

```
# JS
$(".tab-list").on("click", ".tab", function(e) {
  e.preventDefault();
  $(".tab").removeClass("active");
  $(".tab-content").removeClass("show");
  $(this).addClass("active");
  $($(this).attr("href")).addClass("show");
});
```

Backend technológie pre Reddit

- Python
- Flask
- PostgreSQL
- Ubuntu
- Redis
- Cassandra
- Gunicorn
- NGINX

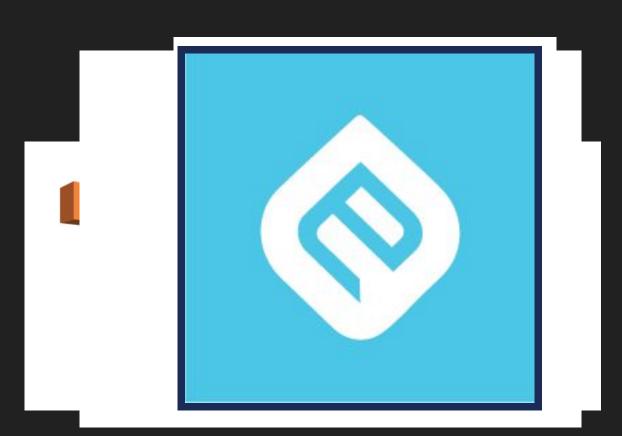

DevOps

- Git
- GitHub

Utilities

- Stripe
- Amazon Route 53
- Twilio
- Mailgun
- Transifex
- Embedly

Ďakujem za pozornosť
